Software Engineer with 5+ years of experience designing and building scalable applications across web and mobile platforms. Strong foundation in software architecture, complex API design, and system integration. Proficient in TypeScript, Node.js, and Dart. Adept at leveraging AI-assisted tools to accelerate development cycles. Proven ability to lead technical projects from concept to deployment, ensuring maintainability, performance, and business value delivery.

Core Competencies

- **Languages & Frameworks:** TypeScript, Node.js, NestJS, React, Next.js, Dart, Flutter, Python.
- **Architecture & Backend:** RESTful APIs, WebSocket, Microservices concepts, PostgreSQL, Prisma ORM.
- **Practices & Tools:** Docker, Git, CI/CD, Agile/Scrum, AI-powered development (Cursor, Claude).

Professional Experience

- **Freelance** **Remote**
Independent Software Engineer *2023–Present*
 - Delivered end-to-end software architecture services, providing scalable web platforms and fintech systems that enabled international clients to digitize their core business operations.
- **Gemart** **Venezuela**
Frontend Manager & Software Engineer *2021–2023*
 - Led a cross-functional team to deliver 4 interconnected applications, enabling synchronized operations between consumers, delivery drivers, and inventory managers.
 - Engineered Python data pipelines to automate market pricing analysis, driving data-informed business decisions.
- **Universidad Católica Andrés Bello** **Venezuela**
Software Developer *2022–2023*
 - Designed an automated graduation-process management system, reducing end-to-end processing time from weeks to under 30 minutes (2,250% efficiency improvement).

Selected Projects

- **Ant Manager:** Co-architected a multi-tenant SaaS restaurant management system (Next.js, NestJS), providing a centralized platform for owners to streamline inventory, order tracking, and staff management.
- **BNPL Fintech Engine:** Engineered a custom "Buy Now Pay Later" financing engine, enabling B2B retail clients to offer flexible credit options. Integrated an automated WhatsApp dashboard, streamlining debt collection and payment reminders.
- **E-Notebook:** Built an extensible productivity platform featuring a dynamic plugin registry, empowering users to customize their note-taking workflows through an integrated marketplace architecture.
- **Incoming:** Developed and published a minimalist personal finance mobile application in Flutter, enabling users to effortlessly track daily expenses and visualize financial habits.

Education & Languages

- **B.S. in Computer Science:** Universidad Católica Andrés Bello (2017–2024).
- **Languages:** Spanish (Native), English (B2 – Professional working proficiency), Italian (Currently practicing).
